

Security Equipment

KC3 Keypad and Decoder Panel

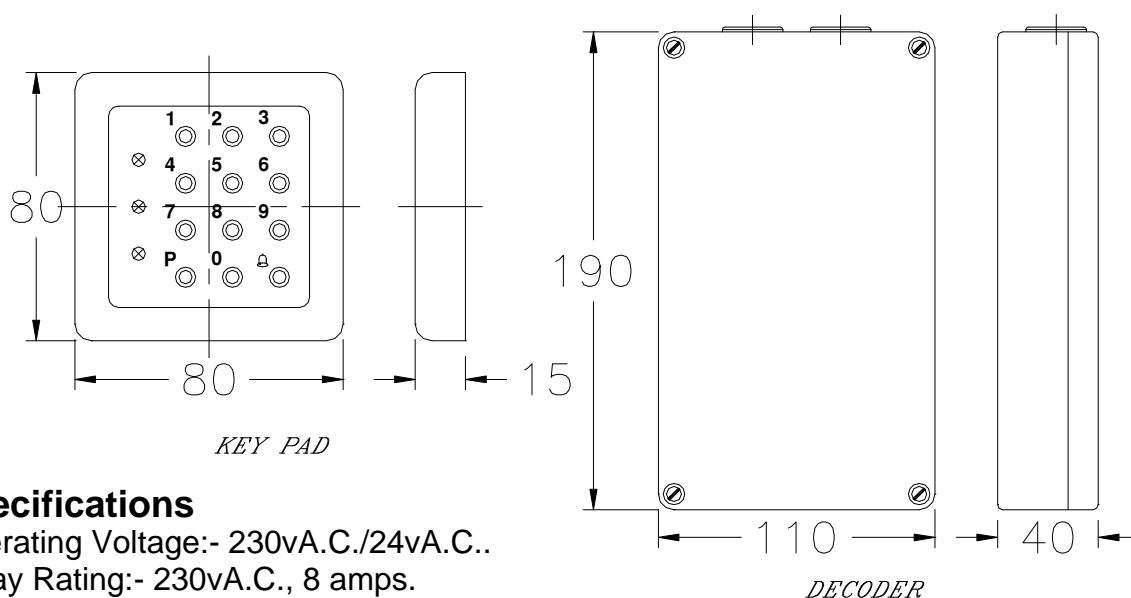

The 'KC3 Key Pad' consists of a keypad & decoder unit, which are linked by a two-wire-cable of any required length. The system has a user changeable optional, 8-digit maximum code, which is preserved during a power failure situation. A power supply is available for operating additional equipment if required and the decoder has three output relays.

Special Features

- * IP 65 Environment Protection.
- * Vandal Resistant.
- * Individual Relay Outputs for 'Open', 'Close' and 'Stop'.
- * Two Wire Connection Between Decoder and Keypad.
- * LED Indication.
- * Lock Out Time for Incorrect Code Entry.
- * 230v Power Supply.
